INTENSIFYING IMPACT THROUGH CONTINUOUS IMPROVEMENT

From the President and the Executive Director and CEO

Welcome to our 2019 Impact Report. The following pages highlight our achievements during the 2019 fiscal year. ABET accreditation assures confidence that we are preparing today’s students for success in the disciplines of applied and natural science, computing, engineering and engineering technology. During the 2018-19 cycle, our Experts participated in 1,098 program reviews around the world. As of October 1, 2019, we currently accredit 4,144 programs at 812 colleges and universities in 32 countries. This represents an increase of 130 programs compared to 2018. We (member societies, volunteers and staff) are proud of our continued growth and impact on higher education globally. Our approach, the standards we set and the quality we guarantee, inspires confidence in those who aim to build a better world — one that is safer, more efficient, more comfortable and more sustainable. This past year, we worked hard on focusing on the future, and our Board of Directors adopted the following strategic priorities for the next three years:

Goal 1: Enhance member society engagement across the scope of ABET activities to maximize the impact and value to both the societies and ABET.

Goal 2: Refine and disseminate a set of consistent, targeted, concise value propositions for ABET accreditation.

Goal 3: Expand ABET quality assurance services in current and emerging educational credentials.

Goal 4: Improve the efficiency and effectiveness of the accreditation cycle.

These goals underscore our commitment to continuous improvement and making ABET an even more influential organization. In a recent example of our efforts, program criteria for cybersecurity at the baccalaureate level and for cybersecurity engineering were fully implemented beginning with the 2019-2020 accreditation cycle, following approval by the Computing Area Delegation and the Engineering Area Delegation, respectively.

Cybersecurity was also highlighted as the theme of our 2019 Symposium: Generation Cyber. This flagship event for accreditation, assessment and the global exchange of best practices in STEM education brought together experts from academia, industry and government to discuss the current cyber landscape and ways to ensure the next generation is equipped to defend our cyberspace and build a safer world.

At ABET, we also believe that understanding, embracing and prioritizing inclusion, diversity and equity in higher education is critical to competitiveness, innovation and our global pursuit to sustainability. To that end, we continue to uphold the principles of diversity and inclusion our Board of Directors approved in 2017.

We are committed to:

• Promoting diversity and inclusion in accreditation operations and governance through the work of staff, volunteers and leadership;
• Encouraging diverse talents to be used in accreditation operations and ABET governance; and
• Promoting inclusive practices and diversity in our accredited educational programs.

To underscore our commitment to these principles, the Board of Directors formed the Inclusion, Diversity and Equity Advisory (IDEA) Council. This Council will ensure that we engage fully in helping further the goals of a more diverse, inclusive and equitable environment for students, faculty and administrators associated with ABET-accredited programs, and will report directly to the Board of Directors.

As we look to the future, we remain focused on assuring confidence that the programs we accredit meet the standards essential to prepare graduates to enter critical STEM fields in the global workforce. This solid educational foundation ensures that the next generation of professionals is capable to lead the way in innovation and emerging technologies to improve the welfare and safety of the public and to take on the complex challenges facing our planet.

Best regards,

Mary Leigh Wolfe, Ph.D. 2018-19 ABET President

Michael K.J. Milligan, Ph.D., P.E., CAE

ABOUT ABET

We are a purpose-driven organization with ISO 9001:2015 certification. A federation comprised of professional and technical member societies, we accredit college and university programs in the areas of applied and natural science, computing, engineering and engineering technology at the associate, bachelor’s and master’s degree levels. Based in Baltimore, our reach is global.

As a specialized accredits, we provide accreditation for post-secondary programs within degree-granting institutions already recognized by national or regional institutional accreditation agencies or national education authorities.

We champion excellence worldwide. Our approach, the standards we set and the quality we guarantee, inspires confidence in those who aim to build a better world—one that is safer, more efficient, more comfortable and more sustainable.

Our accreditation is voluntary and to date 4,144 programs at 812 institutions in 32 countries are ABET-accredited.

With ABET accreditation, students, employers and the society we serve can be confident that a program meets the quality standards that produce graduates prepared to enter a global workforce.

STRATEGIC PRIORITIES 2019–2022

**Goal 1:** Enhance member society engagement across the scope of ABET activities to maximize the impact and value to both the societies and ABET.

**Goal 2:** Refine and disseminate a set of consistent, targeted, concise value propositions for ABET accreditation.

**Goal 3:** Expand ABET quality assurance services in current and emerging educational credentials.

**Goal 4:** Improve the efficiency and effectiveness of the accreditation cycle.
As an organization committed to inspiring excellence in higher education, we admire and applaud remarkable achievements. On November 1, 2019, we gathered at the Hilton in Baltimore’s Inner Harbor for the ABET Awards Celebration. ABET leadership, Experts and staff came together to celebrate the achievements of some of our most dedicated Experts and individuals who are taking huge strides in bringing diversity and innovation to technical education.

Linton E. Grinter Distinguished Service Award

Recipients of the Linton E. Grinter Distinguished Service Award, ABET’s highest honor, are those ABET volunteers who follow in the namesake’s footsteps and who surpass even the highest service expectations of the organization. They are acknowledged for outstanding contributions to the technical disciplines through their work in ABET-related activities.

Susan E. Conry

Susan E. Conry, Ph.D., was chosen for her leadership contributing to the integration of computing accreditation into ABET and to the harmonization of criteria and activities among the ABET commissions. Her persuasive actions during two decades of accreditation activities, including service as Chair of the EAC Criteria Committee, Chair of the ABET Accreditation Council Training Committee, Chair of the EAC and Past Chair of the EAC, have made significant and lasting contributions to the improvement of ABET’s accreditation activities.

Conry was Distinguished Service Professor at Clarkson University until her retirement as Professor Emerita in 2015. She holds a B.S. degree in mathematics, as well as her master’s and doctorate degrees in electrical engineering, all from Rice University. Beginning in 1975, Conry was at Clarkson University in Potsdam, New York, where she held appointments in the Department of Mathematics and Computer Science and in the Department of Electrical and Computer Engineering. She served as chair of the Department of Electrical and Computer Engineering for five years and was Director of Software Engineering from 2007 until her retirement.

She has been engaged in accreditation activities since 1985. Conry served the Computing Sciences Accreditation Commission (CSAC) of CSAB as a program evaluator, commissioner, and member of the executive committee representing the IEEE Computer Society from 1985 until 1992. Conry also served as a member of EAC of ABET from 2002 until 2013 and has served on the IEEE Committee on Engineering Accreditation Activities (CEAA). Conry continues to serve the engineering education community as an ABET adjunct accreditation director for engineering.
The Claire L. Felbinger Award for Diversity and Inclusion recognizes U.S.-based individuals, educational units, associations and firms for extraordinary success in achieving diversity and inclusiveness or for facilitating diversity and inclusiveness in the technological segments of our society.

2019 Claire L. Felbinger Award for Diversity and Inclusion recipient Yvette E. Pearson (right) with daughter, Amber.

Yvette E. Pearson

We honor Yvette E. Pearson, Ph.D., for advancing engineering to ensure equitable opportunities for systemically marginalized groups, especially women, racial and ethnic minorities, and people with disabilities, through education and advocacy.

Pearson is an internationally recognized leader for her efforts in advancing her profession towards more inclusive engineering education and practice. In addition to her role as the Associate Dean for Accreditation, Assessment and Strategic Initiatives in the School of Engineering at Rice University, she has been an ABET Program Evaluator representing the American Society of Civil Engineers (ASCE) since 2013.

Pearson’s work is especially notable for going beyond the typically addressed dimensions of diversity; she intentionally focuses on often overlooked aspects such as visible and invisible disabilities, socioeconomic status and age.
The ABET Fellow Award is presented annually to recognize those individuals who have given sustained quality service to the ABET-related professions, in general, and to education within the ABET disciplines, in particular, through the activities of ABET.

Wayne R. Bergstrom, Ph.D.
For exceptional service and leadership in the implementation of ABET’s governance structure to assure future success.

Scott C. Dunning, Ph.D.
For sustained contributions and leadership in support of engineering technology education.

Jeffrey R. Keaton, Ph.D., P.E.
For outstanding leadership in support of criteria change and for advocacy and awareness of safety protocols.

Ann Lee Kenimer, Ph.D.
For outstanding leadership in enhancing the quality, relevance and impact of ABET accreditation on a global scale.

Kenneth E. Martin, Ph.D.
For sustained contributions to ABET in PEV training, governance restructuring, criteria revision, service on the Computing Area Delegation and leading the integration of computing disciplines into ABET.
ABET Innovation Award

The ABET Innovation Award recognizes vision and commitment that challenge the status-quo in technical education. It honors individuals, organizations or teams that are breaking new ground by developing and implementing innovation into their ABET-accredited programs.

Vertically Integrated Projects (VIP) Consortium

For community-building around and dissemination of the Vertically Integrated Projects model, a scalable, cost-effective approach to undergraduate research adopted by 35 colleges and universities in the U.S. and abroad.

Independent Auditors’ Report

The Board of Directors
Accreditation Board for Engineering
and Technology, Inc.
Baltimore, Maryland

We have audited the accompanying financial statements of Accreditation Board for Engineering and Technology, Inc. (ABET) (a nonprofit organization), which comprise the statements of financial position as of September 30, 2019 and 2018, and the related statements of activities and cash flows for the years then ended, the statement of functional expenses for the year ended September 30, 2019, and the related notes to the financial statements.

Management’s Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors’ Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors’ judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity’s preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of ABET as of September 30, 2019 and 2018, and the changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.
The Board of Directors
Accreditation Board for Engineering and Technology, Inc.

**Emphasis of Matter**

As discussed in Note 3 of the financial statements, ABET adopted Financial Accounting Standards Board’s (FASB) Accounting Standards Update (ASU) 2016-14, *Not-for-Profit Entities (Topic 958): Presentation of Financial Statements of Not-for-Profit Entities*. The requirements of the ASU have been applied retrospectively to all periods presented. Our opinion is not modified with respect to this matter.

* See accompanying Notes to Financial Statements (beginning on page 29).
1. Organization
Accreditation Board for Engineering and Technology, Inc. (ABET) was organized in 1932 and incorporated in 1963. ABET accredits applied science, computing, engineering, and technology programs at colleges and universities throughout the United States as well as internationally. ABET also conducts faculty improvement workshops. ABET is supported primarily by accreditation fees, donated accreditation services, and membership assessments.

2. Summary of Significant Accounting Policies

Basis of Accounting
The accompanying financial statements are presented on the accrual basis of accounting. Consequently, revenue is recognized when earned and expenses when incurred.

Use of Estimates
The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Cash and Cash Equivalents
ABET considers all highly-liquid investments with an initial maturity of three months or less, when purchased, to be cash equivalents.

Investments
Investments are stated at fair value. The valuation of the investments is based upon quotations obtained from national securities exchanges. Where securities are not listed on an exchange, quotations are obtained from other published sources.

Accounts Receivable
Accounts receivable are reported at their outstanding balances reduced by an allowance for doubtful accounts, if necessary.

Management periodically evaluates the adequacy of the allowance for doubtful accounts by considering ABET’s past receivables’ loss experience, known and inherent risks in the accounts receivable population, adverse situations that may affect a client’s ability to pay, and current economic conditions.

The allowance for doubtful accounts is increased by charges to bad debt expense and decreased by charge offs of uncollectible accounts receivable balances. Accounts receivable are considered past due, and then charged off based on management’s determination that they are uncollectible.

Property and Equipment and Intangible Assets
Acquisitions of property and equipment in excess of $1,000 are capitalized. Property and equipment are stated at cost, if purchased, or at fair market value at date of donation, if contributed. Depreciation is provided over the estimated useful lives of the assets on a straightline basis. Expenditures and related betterments that extend the useful life of the asset are capitalized. Expenditures for maintenance and repairs, including planned major maintenance activities, are charged to expense as incurred.

Costs of developing database software have been capitalized. Amortization is provided over the estimated time the database will be utilized and commenced as the phases of the database became operational.

Certificate of Deposit - Restricted
ABET has pledged a $200,000 certificate of deposit to collateralize its American Express credit cards.
Support and Revenues
Revenue from membership assessments is recognized over the period to which the assessments relate, and revenue from professional services is recognized when the related services are performed. Accreditation fees are recognized when ABET releases its final reports.

Contributions received without donor restrictions for ABET’s programs are recognized as support when the donor has made an unconditional promise to give. Contributions that are restricted by the donor are reported as increases in net assets with donor restrictions, depending on the existence and/or nature of the restriction. When the stipulated time restriction ends or the purpose of the restriction is met, net assets with donor restrictions are reclassified to net assets without donor restrictions and reported in the statements of activities as net assets released from restrictions.

There were no net assets with donor restrictions as of September 30, 2019 and 2018.

Donated Services
Donated services are recognized as contributions if the services (a) create or enhance nonfinancial assets or (b) require specialized skills, are performed by people with those skills, and would otherwise be purchased by ABET.

Income Taxes
ABET is exempt from income taxes under Section 501(c)(3) of the Internal Revenue Code (the Code). In addition, ABET has been determined by the Internal Revenue Service not to be a private foundation within the meaning of Section 509(a) of the Code.

ABET requires that a tax position be recognized or derecognized based on a “more-likely-than-not” threshold. This applies to positions taken or expected to be taken in a tax return. ABET does not believe its financial statements include, or reflect, any uncertain tax positions.

ABET’s IRS Form 990, Return of Organization Exempt from Income Tax, and related state filings are subject to examination by federal and state taxing authorities generally for three years after they were filed.

Functional Allocation of Expenses
The financial statements report certain categories of expenses that are attributed to more than one program or supporting function. Therefore, these expenses require allocation on a reasonable basis that is consistently applied. The expenses that are allocated include most operating costs that support various programs and functions. The basis of the allocations is direct costs, which allocates cost based on the department usage of them for program and supporting functions.

Reclassifications
Certain prior year amounts have been reclassified for comparative purposes.

3. Adoption of Accounting Standards Update 2016-14
For the year ended September 30, 2019, ABET adopted Financial Accounting Standards Board (FASB) Accounting Standards Update (ASU) 2016-14, Not-for-Profit Entities (Topic 958): Presentation of Financial Statements of Not-for-Profit Entities. This update addresses the complexity and understandability of net asset classification and provides information about liquidity and availability of resources. The changes required by the update have been applied retrospectively to all periods presented. A key change under ASU 2016-14 is the terminology of net asset classes used in these consolidated financial statements. Amounts previously reported as temporarily restricted and permanently net assets, if applicable, are now reported as net assets with donor restrictions. Amounts previously reported as unrestricted net assets are now reported as net assets without donor restrictions. Additionally, ASU 2016-14 requires a presentation of expenses on a functional basis.

(continued)
4. **Financial Risk**

ABET maintains its cash balances at certain financial institutions which, at times, may exceed federally insured limits. ABET has not experienced any losses in such accounts and believes it is not exposed to any significant financial risk on cash.

ABET invests in professionally managed portfolios that contain mutual funds. Such investments are exposed to various risks such as interest rate, market, and credit. Due to the level of risk associated with such investments and the level of uncertainty related to changes in the value of such investments, it is at least reasonably possible that changes in risks in the near term would materially affect investment balances and the amount reported in the financial statements.

5. **Fair Value Measurements**

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels as follows:

**Level 1** - inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets (examples include mutual funds);

**Level 2** - inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability other than quoted prices, either directly or indirectly, including inputs in markets that are not considered to be active (examples include corporate or municipal bonds and certificates of deposit);

**Level 3** - inputs to the valuation methodology are unobservable and significant to the fair value measurement. The inputs into the determination of fair value require significant management judgment (examples include certain private equity securities and split interest agreements).

Categorization within the valuation hierarchy is based upon the lowest input that is significant to the fair value measurement.

The following presents ABET’s assets and liabilities measured at fair value as of September 30, 2019:

7. Donated Services

ABET records donated services for accreditation services rendered by the volunteer commissioners and program evaluators. During the years ended September 30, 2019 and 2018, ABET recorded approximately $9,851,000 and $11,032,000, respectively, of donated services and accreditation expense in the statements of activities, which represents approximately 68,000 and 76,000 hours of donated time, respectively.

8. Retirement Plan

ABET has a 403(b) retirement plan (the Plan) open to all employees. Employees are eligible for matching contributions after six months of employment, but can elect to defer their wages immediately. Prior to February 1, 2019, ABET contributed up to 8% of a participant’s compensation, subject to statutory limits, provided the participant’s elective deferrals equal or exceed 5% of compensation. ABET amended the Plan to change its matching contributions to a discretionary amount. The amendment was effective February 1, 2019. ABET’s contribution to the Plan was approximately $255,000 and $206,000 for the years ended September 30, 2019 and 2018, respectively.

9. Deferred Compensation Plan

Effective July 1, 2013, ABET established a nonqualified 457(b) deferred compensation plan (the 457 Plan) for certain highly compensated employees. The 457 Plan requires that ABET establish and maintain a book entry account on behalf of the employees for participant salary deferrals and investment experience related to the 457 Plan. Employer contributions are not permitted. ABET is not liable for any specific investment success nor is it required to restore any loss of principal that may occur due to market conditions. Under current law, such funds remain the assets of ABET and, as such, are subject to the creditors of ABET.

10. Related Party Transactions

ABET Foundation, Inc., (the Foundation), a nonprofit corporation, is a supporting organization of ABET. ABET provides services to the Foundation under an Administrative Support Agreement (the Agreement). For the years ended September 30, 2019 and 2018, ABET charged the Foundation approximately $2,000 and $8,000, respectively, for services under the Agreement.

11. Employment Agreement

In March of 2015, ABET entered into an employment agreement with its Executive Director (ED). If the ED is terminated for any reason other than cause, as defined in the employment agreement, ABET will pay severance based on the terms of the employment agreement.
12. Liquidity and Availability of Resources
ABET’s cash flows have seasonal variations due to the timing of accreditation fees, membership assessments, and professional services fees billing. ABET manages its liquidity to meet general expenditures, liabilities, and other obligations as they become due.

As of September 30, 2019, the following financial assets and liquidity sources were available for general operating expenditures in the year ending September 30, 2020:

Financial Assets

<table>
<thead>
<tr>

<td>5,263,494</td>
</tr>
</tbody>
</table>

Total Financial Assets Available for General Operations $12,213,459

13. Subsequent Events
ABET has evaluated subsequent events through March 17, 2020, the date on which the financial statements were available to be issued.

ABET has entered into several contracts with hotels and convention centers for its future conferences and meetings. Many of the contracts contain a clause whereby ABET is liable for liquidated damages in the event of cancellation based upon percentage of the contract price determined by the length of time between the cancellation and the event date. Management is currently evaluating its upcoming conferences, meetings, and seminars due to safety concerns and guidance from public health officials related to the spread of COVID-19. Evaluation includes review of contracts with vendors and participants. Consideration is being given to rescheduling, utilizing video conferencing, and other options. The financial impact of the ultimate decisions regarding these events cannot be estimated at this time. However, ABET is working with vendors, host hotels, and the insurance provider to mitigate the financial loss.
The ABET Board of Directors is the governing body responsible for strategic planning, financial oversight and managing the external relationships of our organization. It is also the final review body for appeal of decisions regarding accreditation actions for a specific program.

Our Board of Directors is comprised of 13 members: a President, President-Elect, Past-President, Secretary, Treasurer, four Area Directors, two At-Large Directors, one Public Director and the Executive Director/CEO (non-voting).

The Board of Directors is advised by three board-level councils: Academic, Industry and Global.

**Officers**

**President**

ABET
ACKNOWLEDGEMENTS

The ABET Board of Delegates is responsible for approving accreditation policies and procedures, general criteria and the organization of our accreditation commissions. Our Board of Delegates is comprised of 1-3 representatives from each of ABET’s member societies. The number of seats on the Board of Delegates is determined by the number of accredited programs for which the society is responsible. The President-Elect serves as a non-voting Chair of the Board of Delegates.

The Board of Delegates is advised by the Accreditation Council.

2018-19 ACADEMIC ADVISORY COUNCIL

The Academic Advisory Council (AAC) provides ABET leadership with access to academic viewpoints on issues of accreditation; applied and natural science, computing, engineering and engineering technology education; matters affecting the relevant professions; and reactions to proposed ABET programs, procedures and policies as they relate to the education sector of ABET constituencies. The AAC also provides opportunities for enhancing communication between ABET and the academic community.

The AAC develops and implements mechanisms to stimulate the involvement of diverse elements of the academic community in the work of ABET through increased participation as Board members, members of the Accreditation Commissions, Program Evaluators, committee members and attendees of ABET professional development events.

Chair
Jeffrey L. Ray, Ph.D., F.ASEE
Western Carolina University

Diversity Task Force Chair
Emily L. Allen, Ph.D.
California State University, Los Angeles

Council Members
Kenneth S. Ball, Ph.D., P.E.
George Mason University
Jaime Bonilla Rios, Ph.D.
Tecnológico de Monterrey, Mexico
Keith Bowman, Ph.D.
University of Maryland - Baltimore County
Ken Burbank, Ph.D.
Purdue University
Molly Gribb, Ph.D., P.E.
University of Wisconsin-Platteville
Charles Isbell, Ph.D.
Georgia Institute of Technology
Keith Johnson, Ph.D.
East Tennessee State University

Cynthia Paschal, Ph.D.
Vanderbilt University
David Tomasko, Ph.D.
The Ohio State University
Cecilia Paredes Verduga, Ph.D.
ESPOL
James Zhang, Ph.D.
Kettering University
The Industry Advisory Council (IAC) provides the ABET Board of Directors with valuable perspectives on ABET’s accreditation programs and procedures. ABET has charged the IAC to:

- Provide industry and government viewpoints on accreditation
- Review proposed changes in ABET programs and policies
- Stimulate industrial firms’ involvement in ABET’s work

Chair
Ronald Hinn, Jr.
PetroSkills

Vice Chair
Jeffrey Abell, P.E.
General Motors Company

Past Chair

ACKNOWLEDGEMENTS

2018-19 ENGINEERING TECHNOLOGY ACCREDITATION COMMISSION

Officers
Chair
James A. Lookadoo, Ph.D.
Pittsburg State University
Chair-Elect
Thomas M. Hall, Ed.D.
Northwestern State
University of Louisiana
Past Chair
Scott C. Dunning, Ph.D.
University of Maine
Vice Chair-Operations
Scott Danielson, Ph.D.
Arizona State University
Members-at-Large
Ciro Capano, P.E.
Capano and Parker Engineers, P.C.
April Cheung, M.S.
Purdue University
Raju S. Dandu, Ph.D.
Kansas State University - Polytechnic Campus
Carol E. Schulte, M.S.
McNeese State University
Public Commissioner
Dana Willmer, Ph.D.
National Institute for Occupational Health and Safety
Board Area Delegation Chair
Larraine Kapka, P.E.
Professor Emeritus, Sinclair College

**2018–19 TEAM CHAIRS**

Team Chairs have demonstrated technical competency and applied knowledge of accreditation criteria, policies and procedures. They are experienced Program Evaluators who lead reviews and interact with the institutional representatives. We owe a debt of gratitude for their dedication and service to ABET and their professions.

The following individuals served as Team Chairs for at least one evaluation visit during the 2018-19 accreditation cycle.

Jeffrey Abell, P.E.
General Motors Company

Said M. Abubakr, Ph.D.
Western Michigan University

Mahesh C. Aggarwal, Ph.D.
Gannon University

Sue Ann B. Allen
University of Pennsylvania

Jennifer Amos, Ph.D.
University of Illinois at Urbana-Champaign

N.K. Anand, Ph.D.
Texas A&M University

Imad Antonios, Ph.D.
Southern Connecticut State University

Raja Aravamuthan, Ph.D.
Western Michigan University

Mark R. Archambault, Ph.D.
Florida Institute of Technology

Asai Asathambhi, Ph.D.
University of North Florida

John O. Attia, Ph.D.
Prairie View A&M University

James H. Aylor
University of Virginia

Kenneth S. Ball, Ph.D., P.E.
George Mason University

Amitabha Bandyopadhyay, Ph.D., P.E.
Farmingdale State College

Douglas N. Barlow, Ph.D.
Arkansas Tech University

Steven F. Barrett, Ph.D.
University of Wyoming

Oscar Barton, Jr., Ph.D.
George Mason University

Rajan Batta, Ph.D.
University at Buffalo

Ronald J. Bennet
University of St. Thomas, Saint Paul

Bruce W. Berdanier, P.E.
South Dakota State University

Bopaya Bidanda, Ph.D.
University of Pittsburgh

David Binning, P.E.
George Mason University

Nancy Birkenheuer, M.S.
Regis University

Jean R.S. Blair, Ph.D.
United States Military Academy

Daisie Boettner, Ph.D., P.E.
Professor Emerita, United States Military Academy

Leonard J. Bohmann, Ph.D., P.E.
Michigan Technological University

William R. Boley
Northrop Grumman

Andrew S. Borchers, DBA, CLTD, CPIM
Lipscomb University

Patricia Brackin
Rose-Hulman Institute of Technology

R. Mark Bricka, Ph.D.
Mississippi State University

Anthony L. Brizendine, P.E.
University of North Carolina at Charlotte

Tim L. Brower, Ph.D.
University of Colorado Boulder

Robert M. Bunch, Ph.D.
Rose-Hulman Institute of Technology

William H. Burkett, Ph.D.
Capella University

Gerald Burnham, Ph.D.
The University of Texas at Dallas

Walter O. Burns, Ph.D.
Metropolitan State University of Denver

Lawrence M. Butkus, Ph.D., P.E.
U.S. Air Force

Mark P. Cal
New Mexico State University

Janet M. Callahan, Ph.D.
Michigan Technological University

Ciro Capano
Private Consulting

Curtis A. Carver, Ph.D.
University of Alabama at Birmingham

S. David Cassel, Ph.D.
Oklahoma Christian University

James A. Cercone, Ph.D.

Program Evaluators, or PEVs, are the backbone of the ABET accreditation process. They visit institutions and review the programs seeking accreditation. To become a PEV, an individual must meet certain qualifications, such as possession of a degree appropriate to the field, demonstrated interest in improving education and membership in at least one of the ABET Member Societies, to name but a few. Once accepted as a PEV, these individuals must undergo an extensive online and in-person training process before they are assigned to visit institutions worldwide.

We owe our Program Evaluators an enormous amount of gratitude for their dedication and service to their professions.

The following individuals served as PEVs for at least one evaluation visit during the 2018-19 accreditation cycle.
